Feedback: The BCG growth-share matrix is based upon market growth rate and market share. The hybrid car market is a high growth market. The Honda Civic hybrid has high market share of this market. The vehicle will require large injections of cash from other products in the Honda line to maintain or increase market share. As a result, the Honda Civic hybrid is a star. The Honda Accord is well-established in a slower-growth market and controls a significant percentage of market share. Thus, the Accord is a cash cow for Honda and the revenues generated from these cars will be used to finance the marketing of the hybrid Civic, the star. See Figure 2-4.

336. Briefly describe the five levels in a hierarchical organizational structure, including the three that are strategic in nature.

Large organizations are extremely complex. They usually consist of three organizational levels whose strategies are linked to marketing, as shown in Figure 2-1. The five levels (three of which are strategic) of structure typically found in large organizations are: (1) the board of directors, which oversees the three levels of strategy in organizations (corporate, business unit, and functional); (2) the corporate level, where the top management directs overall strategy for the entire organization; (3) the strategic business unit level, where managers set a more specific direction for their SBUs (a subsidiary, division, or unit of an organization that markets a set of related offerings to a clearly defined group of customers) to exploit value-creating opportunities; (4) the functional level, found in each strategic business unit and where groups of specialists actually create value for the organization; (5) the departments, which are the specialized functions such as information systems, finance, research and development, marketing, manufacturing and human resources that implement the corporate strategies developed by the organization.

When developing marketing programs for new offerings or for improving existing ones, an organization's senior management may form

cross-functional teams. These consist of a small number of people from different departments who are mutually accountable to accomplish a task or a common set of performance goals. Sometimes these teams will have representatives from outside the organization, such as suppliers or customers, to assist them.

340. Explain what a visionary organization is and the three questions (why, what, and how) that need to be answered to achieve success.

Management experts stress that to be successful, today's organizations must be visionary—anticipating future events and responding to them quickly and effectively. This requires a visionary organization to specify its foundation (why), set a direction (what), and formulate strategies (how). An organization's foundation is its philosophical reason for being—why it exists. Its senior managers must identify its core values and describe its mission and organizational culture, its purpose for being. Next, these managers can set the direction for the organization by defining its business and specifying its long-term and short-term goals. Finally, the firm uses the previous two pieces to formulate its strategies, which vary in at least two ways, partly depending on the level in the organization and the offerings it provides customers. By understanding its core values, an organization can take steps to define its mission, which is a statement of the organization's function in society, often identifying its customers, markets, products, and technologies. Today, the term mission is often used interchangeably with vision. Theodore Levitt argues that senior managers of 20th century American railroads defined their businesses too narrowly by proclaiming, "We are in the railroad business!" This myopic view caused these managers to lose sight of who their customers were and what they needed. Thus, railroad managers only saw other railroads as their direct competitors and failed to develop strategies to compete with airlines, barges, pipelines, and trucks. As a result, many railroads either were forced to merge with other railroads (or other firms) or went bankrupt. Railroads would have fared better if they had realized

they were in the transportation business.

Market share is the ratio of sales revenue of the firm to the total sales revenue of all firms in the industry, including the firm itself. In this case, the sales of the firm itself (\$8 billion) divided by the sales revenue of all firms in the industry, including the firm itself, (\$800 billion) means that the third-party logistics provider in question has a 1 percent market share ( $\$8 \text{ billion} \div \$800 \text{ billion} = 1 \text{ percent}$ ).

The vertical axis is the market growth rate, which is the annual rate of growth of the SBU's industry. The horizontal axis is the relative market share, defined as the sales of the SBU divided by the sales of the largest firm in the industry. The BCG has given specific names and descriptions to the four quadrants in its growth-share matrix. They are as follows: (1) cash cows (lower left quadrant) have a dominant share of a slow-growth market and typically generate large amounts of cash to invest in other SBUs; (2) stars (upper left quadrant) have a high share of high-growth markets and may not generate enough cash to support their own needs for future growth; (3) question marks (upper right quadrant) are SBUs with a low share of high-growth markets and require large amounts of money just to maintain their market share; (4) dogs (lower right quadrant) have a low share of slow-growth markets, and although they may generate enough cash to sustain themselves, they hold little promise of becoming winners for the firm. Step 1: situation (SWOT) analysis is an organization's appraisal of its internal strengths and weaknesses and its external opportunities and threats. Step 2: market-product focus and goal setting determine which products will be directed toward which customers. This decision is often based on market

segmentation, which involves aggregating prospective buyers into groups, or segments, that have common needs and will respond similarly to a marketing action. This enables an organization to identify the segments on which it will focus its efforts—its target market segments—and develop specific marketing programs to reach them. A SWOT analysis is an acronym that describes an organization's appraisal of its internal strengths and weaknesses and its external opportunities and threats. The four critical factors in a SWOT analysis and examples for Ben & Jerry's are (1) internal strengths, such as its prestigious, well-known brand name among U.S. consumers that complements Unilever's existing ice cream brands and its widely recognized social mission, values, and actions; (2) internal weaknesses, which include Ben & Jerry's social responsibility actions that could reduce focus and the need for experienced managers to help increase modest sales and profits; (3) external opportunities, such as the growing demand for quality ice cream in overseas markets, the increasing U.S. demand for Greek-style yogurt, and the many U.S. firms successfully using product and brand extensions; and (4) external threats, such as consumer concern with sugary and fatty desserts, competition with General Mills and Nestlé brands, and increasing competition in international markets. Market segmentation involves aggregating prospective buyers into groups, or segments, that (1) have common needs and (2) will respond similarly to a marketing action. Students' examples will vary. The service organization may decide to sell T-shirts to two segments: current students and local residents. A separate marketing plan should be developed for each segment since they are not necessarily identical. For example, while the price and product may be the same, the place the T-shirts are sold to students would be the campus bookstore, while local residents may buy the T-shirts in a local clothing store at a strip mall. The promotion for the shirts aimed at students may be flyers posted in the dorms and ads in the college newspaper. The promotion aimed at local residents may be an ad in the local community newspaper and flyers posted in the local grocery store.

*Topic: Elements of a Marketing Plan*

364. Explain what a planning gap is and what is used to close it.

A planning gap is the difference between the projection of the path to reach a new goal and the projection of the path of the results of a plan already in place. The ultimate purpose of the firm's marketing program is to fill in this planning gap. This means planning and implementing more aggressive tactics that will allow the new results to meet the new goal.
